Regulations of missing RB Boxes/Waypoints

For cars

According to the 2018 FIA Cross-Country Rally General Prescriptions point 21B (for Bajas) this event is based on Road Book navigation

A correct combination of distance control and visual interpretation of the drawings in the Roadbook is considered enough to follow the race track.

Nevertheless the use of a GPS device is allowed and can be a valid aid for the identification of the directions (CAP) to be taken in several drawings of the Roadbook.

Each box of the Roadbook is considered like a Waypoint and must be validated by passing on the described point of the track with a tolerance of 25 meters

Each missing box of the RB will be penalized by 1 minute.

On request, a list of 13 emergency WPs can be downloaded into the competitors GPS device in order to allow him, in case of being lost in any place alongt the track, to rejoyin the race track in a further point and restart following the Roadbook.

The name of these Waypoints is the number of the box in the Roadbook.

The missing Waypoints (drawings)will be penalized as above described.

For bikes

A GPS file with the complete race track will be provided to the competitors and can be used as an alternative or an aid for the Roadbook navigation.

Missing transit on the official Waypoints (drawings of the Roadbook) will be penalized as described above for the cars .
